

**Electric costs are rising.
We need your help
to keep rates low
In Winner**

Help us "Cut The Peak"

**Save money on your bill.
Save money for our community.**

Cut The Peak is a voluntary program aimed at keeping electrical costs down and electrical reliability high for residents and businesses.

Power prices are highest when everyone is using electricity at the same time, typically on hot summer days or cold winter days.

Receive Rebates for Your Participation!

Central Air Conditioning:

\$7.00 per month for 3 summer months (June, July, August)

Electric Water Heating:

\$3.00 per month for 6 summer and winter months

Electric Heat:

\$0.01 per kilowatt-hour (kWh) for 3 winter months (December, January, February)

How can you help? You can help reduce electrical costs by participating in the Cut The Peak program offered by Winner Municipal Utilities. During times of high electric usage, the utility will send a signal to your air conditioner, electric heat, and/or electric water heater that will cycle it on and off for short periods of time. Customers with this system have experienced little to no change in their level of comfort. In appreciation for your involvement, you will receive rebates for each month of control.

Participating is easy! Installation is **FREE** and you will receive monthly rebates on your bill. Give us a call at [842-2606](tel:842-2606) for more information.
